Mandates of the Working Group on the issue of human rights and transnational corporations and other business enterprises; the Special Rapporteur on the issue of human rights obligations relating to the enjoyment of a safe, clean, healthy and sustainable environment; the Special Rapporteur on the implications for human rights of the environmentally sound management and disposal of hazardous substances and wastes; the Special Rapporteur on the right to food; the Special Rapporteur on the right of everyone to the enjoyment of the highest attainable standard of physical and mental health; the Special Rapporteur on adequate housing as a component of the right to an adequate standard of living, and on the right to non-discrimination in this context; the Special Rapporteur on the situation of human rights defenders; the Special Rapporteur on the rights of indigenous peoples; and the Special Rapporteur on the human rights to safe drinking water and sanitation

REFERENCE:
AL PHL 1/2019

13 February 2019

Excellency,

We have the honour to address you in our capacities as Working Group on the issue of human rights and transnational corporations and other business enterprises; Special Rapporteur on the issue of human rights obligations relating to the enjoyment of a safe, clean, healthy and sustainable environment; Special Rapporteur on the right to food; Special Rapporteur on the implications for human rights of the environmentally sound management and disposal of hazardous substances and wastes; Special Rapporteur on the right of everyone to the enjoyment of the highest attainable standard of physical and mental health; Special Rapporteur on adequate housing as a component of the right to an adequate standard of living, and on the right to non-discrimination in this context; Special Rapporteur on the situation of human rights defenders; Special Rapporteur on the rights of indigenous peoples; and Special Rapporteur on the human rights to safe drinking water and sanitation, pursuant to Human Rights Council resolutions 35/7, 37/8, 32/8, 36/15, 33/9, 34/9, 34/5, 33/12 and 33/10.

In this connection, we would like to bring to the attention of your Excellency’s Government information we have received concerning allegations of the failure of the Government of the Philippines to protect the human rights of the indigenous peoples and local communities living near Dipidio, Nueva Vizcaya Province, the impact on the livelihood of the population and the overall environmental degradation in this region, which are resulting from the exploitation of a gold and copper mine by OceanaGold Corporation, an Australia-based mining company.

According to the information received:

OceanaGold Corporation (hereafter “the company”), is an Australia-based mining company that operates a gold and copper mine in Didipio (hereafter “the mine”) in the Northern Luzon province of Nueva Vizcaya, under a Financial and Technical Assistance Agreement (FTAA), which grants rights to explore, extract and utilize minerals for development and commerce for a 25-year period. Originally, the FTAA was signed in 1994 between the Government of the Philippines and Climax-Arimco Mining Corporation, which merged with OceanaGold in 2006.
The FTAA will expire in June 2019, but can be renewed by the Government for another 25 years.

The protests of local communities, including indigenous peoples, among them the Bugkalot, Ifugao, Ibaloi, Kankanaey, and criticism from various organizations delayed the operations of the mining company for more than a decade. In June 2008, around 180 families were forcibly evicted from their homes, which were destroyed by the company staff supported by heavily-armed members of the national police. Residents were beaten and suffered various injuries while their houses were being bulldozed off cliffs and burned down. It is reported that these forced evictions were carried out without a court order. In addition, some small farmers, including from indigenous communities, were forced through intimidation and harassment to sell their lands and farms to the company, or convinced to do so because the company and its proxies, including some local officials, misrepresented the impacts of the mining activities on the economic development of the region and the environment. In addition, some who had agreed to sell their lands never received an adequate compensation or even the amount they had agreed to.

In October 2009, another attempt to demolish several houses was reported which resulted in the violent dispersal of protesting residents by the national police who used truncheons, shields and tear gas.

In 2011, the Commission on Human Rights of the Philippines investigated the human rights abuses and violations that occurred in the context of the establishment of the mine. It concluded that the company had violated the residents’ rights to adequate housing, rights to property, rights to freedom of movement, and their rights to security, as well as the rights of the indigenous communities to manifest their culture and identity. It further concluded that the police had used excessive force during the forced evictions. Therefore, the Commission recommended that the Government investigate the human rights abuses and “consider the probable withdrawal of the FTAA”. In spite of the conclusions of the Commission, the company started the commercial exploitation of the mine in 2013, both through an open-pit and via underground mining.

In 2014, some civil society organizations (CSOs) conducted in depth studies of the negative impacts of the mining activities on the environment and surrounding ecosystems. They concluded that the establishment of the mining facilities and conduct of the mining operations were threatening the rich biodiversity of the area and had devastating impacts on the environment. For example, large areas of forests have been lost as the company was given in 2008 a special permit to cut

---

more than 17,000 trees for the development of the mine. Reportedly, the company continued to cut trees afterwards and in breach of the 1995 Mining Act and the Revised Forestry Code, it did not undertake the mandatory reforestation of the zone. At the same time, the local and indigenous communities were prohibited from harvesting trees and forest products in forest areas located within the mining concession.

Currently, as the mine operates 24 hours a day, seven days a week, air pollutants, primarily dust, are persistent and led to a high incidence of respiratory illnesses particularly among children and the elderly, especially during summer time. In addition to impacting the right to health, those air pollutants also affected agricultural productivity, with lower crop yields being experienced by local farmers.

The Didipio river is allegedly contaminated by heavy metals. It is reported that the local communities rely on the Didipio river as source of drinking water and water for personal uses as well as for agriculture and irrigation purposes. Due to the contamination of the river, allegedly, the local communities were not able to access safe drinking water. The CSOs found that the concentration of copper in the river exceeds the Severe-Effect Level and the maximum level both for irrigation use and the survival of aquatic organisms, which are 200 μg L-1 and 50 μg L-1, respectively. The sediments of the river are heavily polluted and could negatively affect human health as well as benthic or sediment-dwelling organisms. The mine stands at the headwaters of a river that flows into the longest river system in the entire country, as it flows through four provinces, past millions of homes, and becomes the mighty Cagayan River before emptying into the Pacific Ocean on the northern end of Luzon island. The same river flows through irrigation facilities that sustain agriculture and through hydro-electric dams that provide power to the Luzon Grid. Therefore, contaminants from the mine could potentially put at risk millions of livelihoods and critical ecosystems.

Moreover, in spite of the strict laws governing toxic chemicals in the Philippines, the company has managed to maintain a total opacity on the possible use of cyanide, a toxic chemical, in its mining activities. It appears that no government officials know with certainty what processing chemicals are used at the mine, while the presence of dead and dying trees in the surroundings of the tailings pond and impacts on water quality and biota downstream suggest that dangerous chemicals are indeed used or released through processing.

Through 2017, forced evictions of at least 133 families were carried out in the villages of Kakiduguen, Biyoy and Dine. In addition, there has been an increase of the military presence in the region, allegedly to fight against the communist insurgents. However, in practice, the military appear to be protecting the company and preventing any form of protest against the company and its activities. As a result of this heavy military presence in the region, community leaders and environmental rights defenders feel increasingly at risk of being harassed,
arbitrarily arrested and detained, especially as they have been accused by the military of supporting the communist rebels.

In February 2017, the Nueva Vizcaya Provincial Government issued a report in which it denounced the negative impacts of the mine activities on the environment and the local communities.

On 14 February 2017, following an audit, the then-Secretary of the Department of Environment and Natural Resources (DENR), Ms. Gina Lopez, issued an order of suspension of the mining activities of the company in Didipio because of the human rights and environmental violations and abuses documented since the company started its activities. However, the company appealed to the Office of the President of the Philippines, which stayed the suspension order, citing due process issues. Furthermore, the DENR Secretary was replaced by a former military officer.

In 2018, the company requested to extend and expand its mining operations. Local communities sent numerous petitions to the Government, including the new DENR Secretary, and to local authorities to oppose the extension of the mine and to request the suspension of its operations. The petitioners have not received any reply yet.

Without prejudging the accuracy of these allegations, we express our most serious concern about the degradation of the environment and human rights violations and abuses due to the mining activities carried out by the company in Didipio, with the support of the national police, and the apparent lack of action of your Excellency’s Government in this regard.

In connection with the above alleged facts and concerns, please refer to the [Annex on Reference to international human rights law](#) attached to this letter which cites international human rights instruments and standards relevant to these allegations.

As it is our responsibility, under the mandates provided to us by the Human Rights Council, to seek to clarify all cases brought to our attention, we would be grateful for your observations on the following matters:

1. Please provide any additional information and/or comment(s) you may have on the above-mentioned allegations.

2. Please indicate the judicial, administrative, legislative or other steps taken by your Excellency’s Government to prevent further environmental degradation and human rights violations and abuses, in particular those of indigenous peoples, as a result of the mining activities of the company in Didipio. Please explain how the environmentally damaging mining activities can be reconciled with the people’s right to a healthy and
balanced environment pursuant to Section 16 of the Constitution of the Philippines.

3. Please provide information on the investigation carried out, as requested by the Commission on Human Rights of the Philippines, on the human rights violations and abuses that occurred in the context of the establishment of the Didipio mine, and in particular the forced evictions and excessive use of force by the national police, as well as the violations of the indigenous peoples’ rights. Please indicate if any compensation has been provided to the victims or what are the effective remedies available to them.

4. Please provide, in detail, information on the process and the outcome of the investigations to determine the case of the contamination of Didipio River including its origin, victims and the impact on the health and food security of the communities as well as the impact on the surrounding environment;

5. Please indicate the measures taken to ensure that residents of the areas near the mine have adequate access to health care diagnosis and treatment.

6. Please provide information on measures taken by your Excellency’s Government to monitor and mitigate the contamination of the Didipio River. Please provide any details regarding steps taken to ensure the quality and safety of drinking water and sanitation for the affected population including any water quality test in accordance with WHO standards.

7. Please provide the details of the measures taken by your Excellency’s Government to ensure the effective implementation and enforcement of its national legislation and regulations relating to mining activities, in particular for the issuance of FFTA, as well as the protection of the environment by mining companies. Please also indicate whether human rights and environmental impact assessments were undertaken before the FFTA was signed in 1994 and will be carried out with regard to the extension and expansion of the mine requested by OceanaGold and the possible renewal of the FFTA in 2019, and if so kindly provide details of the assessments and results, even if only preliminary. Please explain the decision of the Office of the President to stop the order of suspension of OceanaGold Corporation activities taken on 14 February 2017 by the former Secretary of the Department of Environment and Natural Resources, and what your Excellency’s Government is intending to do in this regard.

8. Please indicate what measures have been taken to ensure that environmental rights defenders and local community leaders are able to
carry out their legitimate work in a safe and enabling environment in the Philippines, without fear of persecution and harassment of any sort.

9. Please indicate the steps that the Government has taken, or is considering to take, to ensure the implementation of the United Nations Guiding Principles on Human Rights, such as (i) setting out clearly the expectations that all businesses respect human rights throughout their operations, including human rights due diligence and (ii) taking appropriate steps to ensure the effectiveness of domestic judicial mechanisms with respect to business-related human rights abuses.

10. Please indicate what steps have been taken to ensure that people who have been victims of human rights violations, in particular forced evictions, loss of lands and violations of the right to health, are compensated and have access to effective remedy.

We would appreciate receiving a response within 60 days. Passed this delay, this communication and any response received from your Excellency’s Government will be made public via the communications reporting website. They will also subsequently be made available in the usual report to be presented to the Human Rights Council.

While awaiting a reply, we urge that all necessary interim measures be taken to halt the alleged violations and prevent their re-occurrence and in the event that the investigations support or suggest the allegations to be correct, to ensure the accountability of any person(s) responsible for the alleged violations.

Please be informed that a letter on the same matter has also been sent to the government of the Australia and to the involved company.

Please accept, Excellency, the assurances of our highest consideration.

Surya Deva
Chair-Rapporteur of the Working Group on the issue of human rights and transnational corporations and other business enterprises

David R. Boyd
Special Rapporteur on the issue of human rights obligations relating to the enjoyment of a safe, clean, healthy and sustainable environment

Baskut Tuncak
Special Rapporteur on the implications for human rights of the environmentally sound management and disposal of hazardous substances and wastes

Hilal Elver
Special Rapporteur on the right to food

Special Rapporteur on the right of everyone to the enjoyment of the highest attainable standard of physical and mental health

Leilani Farha
Special Rapporteur on adequate housing as a component of the right to an adequate standard of living, and on the right to non-discrimination in this context

Michel Forst
Special Rapporteur on the situation of human rights defenders

Victoria Lucia Tauli-Corpuz
Special Rapporteur on the rights of indigenous peoples

Léo Heller
Special Rapporteur on the human rights to safe drinking water and sanitation
Annex
Reference to international human rights law

In connection with above alleged facts and concerns, we would like to recall the relevant applicable international human rights norms, as well as authoritative guidance on their interpretation. These include:

- The International Covenant on Economic, Social and Cultural Rights (ICESCR);
- The International Covenant on Civil and Political Rights (ICCPR)
- The Convention on the Rights of the Child (CRC)
- The United Nations Declaration on the Rights of Indigenous Peoples;
- The Framework Principles on Human Rights and the Environment;
- The United Nations Guiding Principles on Business and Human Rights;
- United Nations Declaration on Human Rights Defenders; and
- Basic principles and guidelines on development-based evictions and displacement

In relation to the right to an adequate standard of living, including the right to housing, under article 11 of the International Covenant on Economic, Social and Cultural Rights, ratified by the Philippines on 7 June 1974, we further recall the General Comments No. 4 and 7 of the Committee on Economic Social and Cultural Rights (CESCR), which stress the need to provide adequate legal protection from forced eviction, due process, alternative accommodation, and access to an effective remedy of those that are affected by eviction orders. As forced evictions usually violate also other human rights, such the freedom from cruel, inhuman and degrading treatment (ICCPR, art. 7), the right to security of the person (ibid., art. 9.1) and the right to non-interference with privacy, home and family (ibid., art 17) they constitute gross violations of human rights. According to these General Comments, States must further explore all feasible alternatives to forced eviction in consultation with the affected individuals and families. Moreover, it must carry out informed consultation, ensure that forced evictions will not lead to homelessness by providing adequate alternative housing facilities, resettlement and compensation for lost property. We also recall the Special Rapporteur on adequate housing’s report on the obligations of subnational and local governments in the implementation of the right to adequate housing (A/HRC/28/62) and on homelessness (A/HRC/31/54). We also call your attention to the Basic Principles and Guidelines on Development-based Evictions and Displacement (A/HRC/4/18, Annex).

We recall the explicit recognition of the human rights to safe drinking water by the UN General Assembly (resolution 64/292) and the Human Rights Council (resolution 15/9), which derives from the right to an adequate standard of living, protected under, inter alia, article 25 of the Universal Declaration of Human Rights, and article 11 of ICESCR. In its General Comment No. 15, the Committee on Economic, Social and Cultural Rights clarified that the human right to water means that everyone is entitled to
sufficient, safe, acceptable, physically accessible and affordable water for personal and domestic uses.

Furthermore, the UN General Assembly (resolution 70/169) and the Human Rights Council (resolution 33/10) recognized that water and sanitation are two distinct but interrelated human rights. In particular, we recall explicit recognition that “the human right to sanitation entitles everyone, without discrimination, to have physical and affordable access to sanitation, in all spheres of life, that is safe, hygienic, secure, socially and culturally acceptable and that provides privacy and ensures dignity, while reaffirming that both rights are components of the right to an adequate standard of living”.

We wish to refer also to article 12 of ICESCR, which guarantees the right of everyone to the enjoyment of the highest attainable standard of physical and mental health. In its General Comment No. 14 on article 12, the CESCR interprets the right to health as “an inclusive right extending not only to timely and appropriate health care but also to the underlying determinants of health, such as access to safe and potable water and adequate sanitation, an adequate supply of safe food, nutrition and housing, healthy occupational and environmental conditions, and access to health-related education and information” (para. 11). Moreover, according to General Comment 14, States are required to adopt measures against environmental and occupational health hazards and against any other threat as demonstrated by epidemiological data. For this purpose they should formulate and implement national policies aimed at reducing and eliminating pollution of air, water and soil (para. 36). In addition, the Committee clarifies that in some cases, “violations of the obligation to protect follow from the failure of a State to take all necessary measures to safeguard persons within their jurisdiction from infringements of the right to health by third parties. This category includes such omissions as the failure to regulate the activities of individuals, groups or corporations so as to prevent them from violating the right to health of others; the failure to protect consumers and workers from practices detrimental to health …” (para. 51).

We also wish to highlight that Article 6 of the Convention on the Rights of the Child (CRC) recognizes that every child has the inherent right to life and requires States parties ensure to the maximum extent possible, the survival and development of the child. Article 24 (1) and (2) stipulates States Parties should recognize the right of the child to the enjoyment of the highest attainable standard of health. Article 24 (2)(c) in particular stipulates that States should combat disease and malnutrition (…) inter alia, through the provision of adequate clean drinking-water and taking into consideration the dangers and risks of environmental pollution. Related to this, in his thematic report A/HRC/33/41 of 2016 the Special Rapporteur on the implications for human rights of the environmentally sound management and disposal of hazardous substances and wastes reiterates that States should prevent childhood exposure to pollution and toxic chemicals as part of their obligation to protect children, and guarantee an effective remedy for exposure and environmental contamination.

Furthermore, the United Nations Declaration on the Rights of Indigenous Peoples (UNDRIP), adopted by the General Assembly in 2007, elaborates upon existing binding
rights in the specific cultural, historical, social and economic circumstances of indigenous peoples. With respect to their rights to property in the form of land and natural resource rights, Article 26 states the right of indigenous peoples to ‘the lands, territories and resources which they have traditionally owned, occupied or otherwise used or acquired’ and for legal recognition of those rights ‘with due respect to the customs, traditions and land tenure systems of the indigenous peoples concerned.’

UNDRIP sets out that indigenous peoples have the right to the conservation and protection of the environment and the productive capacity of their lands or territories and resources and that States shall take effective measures to ensure that no storage or disposal of hazardous materials shall take place in the lands or territories of indigenous peoples without their free, prior and informed consent. (Article 29).

In addition, UNDRIP affirms in Article 32 that indigenous peoples have the right to determine and develop priorities and strategies for the development or use of their lands or territories and other resources and that ‘States shall consult and cooperate in good faith with the indigenous peoples concerned through their own representative institutions in order to obtain their free and informed consent prior to the approval of any project affecting their lands or territories and other resources, particularly in connection with the development, utilization or exploitation of mineral, water or other resources’.

UNDRIP provides for the rights of indigenous peoples to redress for actions that have affected the use and enjoyment of their traditional lands and resources. In that regard, Article 28 states that ‘indigenous peoples have the right to redress, by means that can include restitution or, when this is not possible, just, fair and equitable compensation, for the lands, territories and resources which they have traditionally owned or otherwise occupied or used, and which have been confiscated, taken, occupied, used or damaged without their free, prior and informed consent.’ Article 32 of UNDRIP sets out that States shall provide effective mechanisms for just and fair redress for any such activities, and appropriate measures shall be taken to mitigate adverse environmental, economic, social, cultural or spiritual impact. Article 10 affirms that indigenous peoples ‘shall not be forcibly removed from their lands or territories. No relocation shall take place without the free, prior and informed consent of the indigenous peoples concerned and after agreement on just and fair compensation and, where possible, with the option of return.

As detailed in the Framework Principles on Human Rights and the Environment (A/HRC/37/59), annex), which summarize the main human rights obligations relating to the enjoyment of a safe, clean, healthy and sustainable environment, States should ensure a safe, clean, healthy and sustainable environment in order to respect, protect and fulfil human rights (Framework Principle 1). Furthermore, States should respect, protect and fulfil human rights in order to ensure a safe, clean, healthy and sustainable environment (Principle 2). States should also ensure the effective enforcement of their environmental standards against public and private actors (Principle 12), and they should take additional measures to protect the rights of those who are most vulnerable to, or at particular risk from, environmental harm, taking into account their needs, risks and capacities (Principle 14).
Regarding the alleged lack of information on the possible use of cyanide, which is a toxic chemical, we wish to refer to the fundamental principles laid down in Article 19 of the UDHR, and Article 19(2) of the ICCPR which guarantee the right to “seek, receive and impart information” as part of the right to freedom of expression. Access to information is a prerequisite to the protection of human rights from hazardous substances, to public participation in decision-making and for monitoring governmental and private-sector activities. Public participation in decision-making is based on the right of those who may be affected to speak and influence the decision that will impact their basic human rights.

The obligation of States to realize the right to information about hazardous substances to the public is emphasized in the 2015 Report of the Special Rapporteur on the implications for human rights of the environmentally sound management and disposal of hazardous substances and wastes (A/HRC/30/40) in section III.A.

A human rights-based approach to hazardous substances and wastes, including pollutants, toxic industrial chemicals and pesticides, requires a specific focus on the protection of those most vulnerable or at risk: children, the poor, workers, persons with disabilities, older persons, indigenous peoples, migrants and minorities, while taking into account gender-specific risks, as noted by the Special Rapporteur on the implications for human rights of the environmentally sound management and disposal of hazardous substances and wastes in his 2017 report (A/HRC/36/41). He also highlighted that States must ensure that laws, policies and institutions aimed at assessing and mitigating the potential impacts of toxics are based on the needs of the most vulnerable.

We would also like to highlight the United Nations Guiding Principles on Business and Human Rights, which were unanimously endorsed by the Human Rights Council in resolution A/HRC/RES/17/31 in 2011. These Guiding Principles are grounded in recognition of:

a) “States’ existing obligations to respect, protect and fulfil human rights and fundamental freedoms;
b) “The role of business enterprises as specialized organs of society performing specialized functions, required to comply with all applicable laws and to respect human rights; and
c) “The need for rights and obligations to be matched to appropriate and effective remedies when breached.”

It is a recognized principle that States must protect against human rights abuses by business enterprises within their territory. As part of their duty to protect against business-related human rights abuse, States are required to take appropriate steps to “prevent, investigate, punish and redress such abuse through effective policies, legislation, regulations and adjudication” (Guiding Principle 1). In addition, States should “enforce laws that are aimed at, or have the effect of, requiring business enterprises to
respect human rights…” (Guiding Principle 3). The Guiding Principles also require States to ensure that victims have access to effective remedy in instances where adverse human rights impacts linked to business activities occur.

The Guiding Principles also clarify that business enterprises have an independent responsibility to respect human rights. However, States may be considered to have breached their international human rights law obligations where they fail to take appropriate steps to prevent, investigate and redress human rights violations committed by private actors.

The Guiding Principles also recognise the important and valuable role played by independent civil society organisations and human rights defenders. In particular, Principle 18 underlines the essential role of civil society and human rights defenders in helping to identify potential adverse business-related human rights impacts. The Commentary to Principle 26 underlines how States, in order to ensure access to remedy, should make sure that the legitimate activities of human rights defenders are not obstructed.

We would also like to highlight the fundamental principles set forth in the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms, also known as the UN Declaration on Human Rights Defenders. In particular, we would like to refer to articles 1 and 2 of the Declaration which state that everyone has the right to promote and to strive for the protection and realization of human rights and fundamental freedoms at the national and international levels and that each State has a prime responsibility and duty to protect, promote and implement all human rights and fundamental freedoms.
